THE SYLVANS CLUB
OF STEPHEN F. AUSTIN STATE COLLEGE
PRESENTS
TEXAS TALLY
1963
DEDICATION

We, the Texas Tally Staff, dedicate the 1963 annual to Dr. Robert Baker, Associate Professor of Forestry at Stephen F. Austin State College. "Doc" has been at SFA eight years and during that time has been a great asset to the School, the Department of Forestry, and to our Sylvans Club. He is always available when help is needed in studies or club activities. To you, Dr. Baker, in appreciation for all you do, we dedicate this annual.

FOREWORD

The staff of the TEXAS TALLY presents to you the 1963 annual in hopes it will give you a permanent record of your activities of the 1962-63 school year.

This annual has been made possible through the tireless efforts of the staff, the Department of Forestry, and the Sylvans Club.

A special thanks must be given to our faculty sponsor, Mr. Billy Dean Scott, who gave us many hours of his time and assistance.

The editorship of the TEXAS TALLY has been a rewarding experience for me, and I want to thank my staff for its cooperation in making this annual a success.

REPORT FROM THE DEPARTMENT

Dr. Arne K. Kemp

It is a pleasure for me to have this opportunity to report on the activities, progress and problems that have taken place in the Forestry Department during the interim period from the last report.

During the October meeting of the Society of American Foresters in Atlanta, Georgia, the Committee for the Advancement of Forestry Education again reviewed our request for accreditation. Although we have shown substantial improvement in our program since the 1959 examination, accreditation, nevertheless, was denied us because of "institutional status," which has been affixed to us like fly paper. Apparently, the size of the parent institution is the dominating factor in determining accreditation. Our failure to obtain accreditation is disappointing to us, of course, but it has not dampened our spirits. We intend to continue offering a sound educational and research program in forest management, and will modify and expand it to stay abreast of our changing professional requirements. Perhaps sometime in the future the entire accrediting procedure will be revised and we then might have a better opportunity for again asking for accreditation.

This year we have added one new faculty member, a temporary replacement, and a research technician to the Department personnel. Dr. Gerhardt Schneider has joined us from Michigan State University where he received his Ph.D. in forest soils and ecology. Here he will handle course work in forest soils and forest influences and spend the remaining portion of his time conducting research in those disciplines. Professor Billy Dean Scott is a temporary replacement for Dr. Nelson Samson who is on a United Nations assignment in Santiago, Chile. Professor Scott received his Masters Degree from Yale and formerly was employed as a forester in Arkansas by the Herman Wilson Co. After completion of his assignment here in 1964, he plans to continue his study for a Ph.D. degree. In the meantime Dr. Samson is busy implementing a forestry program in Chile. We wish him much success. In order to expedite our research effort we have added another research technician, Mr. Billy Spradley, to help the different faculty members with their research projects.

For the first time since 1955, the enrollment in the Forestry Department has exceeded the century mark. Our enrollment in the fall constitutes 102 students, 99 majors and 3 minors. This represents an approximately 20 per cent increase over the previous years. During the year 10 students were graduated, all of whom have found employment in government and industry. This is encouraging to us in the light of a tightening employment market.
REPORT CONTINUED

In the research area, the Department of Forestry has made substantial progress. Dr. Victor Bilan has been awarded a National Science Foundation grant of $34,900.00 to study growth and development of root systems in loblolly pine seedlings during the first two years of growth. The proposed study will consist of a series of experiments dealing with the fundamental processes and conditions affecting the growth and development of root systems in loblolly pine seedlings during their two years of growth. The study will extend over a period of three years. Dr. Bilan also has received a $3,000.00 grant from the Southern Forest Experiment Station for a cooperative study of the development of Southern Pine Seedlings in the East Texas tension zone soils. In addition he has a number of other individual research projects under way. Dr. Robert Baker has received a $3,000.00 grant from the Southern Forest Experiment Station to conduct a study to improve forest survey sampling techniques with the aim of lowering sampling errors and increasing the reliability of volume estimates at the county level. This study will encompass most of the East Texas area, and after it is completed, a subsequent study will be made of the West Texas area under a separate grant. The periodic re-evaluation by Dr. Baker and Professor Hunt of the C.F.I. plots located at the Sabine National Forest is nearing completion and a publication should be released shortly. We are pleased that Dr. Gerhardt Schneider and Professor Billy Dean Scott have recently undertaken some cooperative research projects with the East Texas Research Center, for cooperative research studies have been mutually beneficial and have served to broaden and strengthen the research effort on the College Campus. We look forward to an expansion of such cooperation.

This year the Department of Forestry offered its ninth annual short course during March 18-22 covering the subject matter of point sampling. Subject matter discussed included basic point sampling theory, sampling analysis, specialized application, methods and tools, field problems and evaluation of problems. Coordinators for the short course were Dr. Robert D. Baker and Ellis V. Hunt.

This year Dr. Robert Dils of Colorado State University was our Visiting Scientist under the auspices of the Society of American Foresters and the National Science Foundation. During his visit, Dr. Dils discussed "From Whence Water Will Come For Tomorrow in the United States," "Swiss and Austrian Forestry and Watershed Management," "The Effects of Silviculture on Watershed Management," "Watershed Management as Related to Various Soils and Their Properties," "Evaluation Aspects of Watershed Management" and "The Objectives of Watershed Management Curriculum and Courses." His lectures and discussions served to complement our present coursework in forest influences.
Dr. M. V. Bilan, Dr. R. D. Baker, E. V. Hunt, Dr. G. Schneider, Dr. A. K. Kemp, B. D. Scott, L. T. Effenberger

Coffee???

It's this way, E. V.

All I want is your Money.
Back row: Sponsors; Dr. Baker, Dr. Kemp, Mr. Hunt. Front row: Officers; D. Salyer, Treasurer; C. Gaumer, Vice President; B. Gibson, President; R. Modisette, Secretary; F. Birch, Sergeant-at-arms.

THE SYLVANS

This organization was formed in 1946 to develop competent, aggressive forestry leaders; to create, develop and promote an interest in forestry; and to foster goodwill throughout this institution, community, and surrounding territory. With these aims in mind, the Sylvans this year engaged speakers in forest industries to address the club members.

Money obtained through work projects and the sale of ads for the TEXAS TALLY went this year to finance the club’s hunting party and the annual Christmas Dinner-Dance in the Fall, and the fishing trip and conclave trip in the Spring.

This year was a good one for the club in SFA intramurals. We took second in football, first in ping-pong, and second in the basketball playoffs.

We are happy to say that due to the cooperation of the members this has been a very successful year.

Start with 12 trees — harvest 15 — end up with 13! That's a miracle in anyone's book and yet that's just what the South has done in 25 years.

In 1935, Southern forests contained 120 billion cubic feet of wood. Since then, 147 billion cubic feet have been harvested. But these forests still contain more than 131 billion cubic feet — nine per cent more wood now than before that mammoth harvest.

I-P is proud that its foresters played a key role in this miracle of reforestation. Now they are meeting new challenges — like managing timberland for such varied purposes as watershed protection, hunting, and public recreation — or, using forest geneticists to develop improved strains of pines — or conducting complex economic studies in order to realize the greatest financial return from each acre of timberland.

This is truly modern forestry and it demands an ever-increasing number of college-trained men skilled in the latest technique of their profession.
SUMMER CAMP 1962

On June 4, 1962, twelve Stephen F. Austin forestry students arrived at the S. F. A. forestry camp, located in the Sabine National Forest near Milam, Texas.

Ready and determined, these twelve faced the coming summer of difficult but profitable study. The main objectives of the camp courses are to obtain actual field experience and, of course, to improve the students' ability to determine the correct time for a "Winston break." In crews with three men, the latter required a high degree of cooperation.

Forest utilization, the first course of the summer, turned out to be strictly a travel course. Dr. Kemp and the lucky twelve visited sawmills, paper mills, furniture factories, and chemical plants located all over East Texas and West Louisiana.

After utilization came logging and sawmilling in which the woods-scholars needed a strong back. Under the guidance of Mr. E. V. Hunt, Jr., the crew logged a portion of the special use area of the Sabine National Forest and then cranked up the sawmill. Since this was the first sawmilling experience for the students, the sawdust and slab piles grew much more rapidly than the lumber stock.

As the finale of the first summer session, Dr. R. J. Wallace instructed the "scurvy" crew in the art and science of silviculture. After a few lengthy lectures, everyone was ready for an opportunity to practice his newly acquired knowledge. With aid of various tree deadening instruments, the group did some CTR work in pine and white oak stands near by.

The second session began with ten students "eagerly" awaiting the two remaining courses, forest mensuration and surveying. Two weeks of timber cruising and report writing almost erased the cheerful spirits of this carefree group, but there was a peppy recovery as surveying took the limelight. Dr. R. D. Baker had his hands full instructing this, the final course of the summer. "No, just a little more to the right," could be heard all over the special use area. Eventually the lines did run in the right direction, maybe....
Rheiner and them

Cut on the dotted line.

Close enough for government work

One of the Sylvans Club's annual events is the Departmental Field Day in which forestry students compete in various sports and skills. This year, the field day was no exception to the past; everyone had fun and enjoyed the competition.

In traditional form, the seniors finished in "third place" while trying to compete with Mr. Hunt's skillful score keeping. The champs for the day were the underdogs—the juniors.

Usual sights seen throughout the day were: Doc. Wallace winning the volleyball event for the juniors; Dr. Kemp walking around with his camera, baseball cap, and tenny-runners; Dr. Baker and his over-exposed camera; Mr. Hunt scoring in his unique way for the volleyball game; and Dr. Bilan giving his team instructions; no wonder they lost! New in the field were Dr. Schneider and Mr. Scott.

Among the events for the day were: crosscut saw; bow saw; egg throw; volleyball; horse shoes; crab race; sack race; knife throw; ax throw; threeleg race; football throw; and wheel barrow race.

Everyone had a lot of fun and plenty of good food to eat. Maybe the seniors will win next year!
INTRAMURALS

The Sylvans Club teams have been doing a fine job representing our club this year. At present time, we have the highest number of team points in the intramural league.

Our football team, coached by Dr. Schneider, placed second; and our basketball team, coached by Mr. Scott, finished the tournament in second place. Our thanks must go to our two coaches for their time and effort used in helping our teams.

Jack Gann, contributed to our team score by winning the table tennis tournament.

Our teams have done much to improve the spirit of the club and to increase the respect for the Sylvans on the SFA campus. With three sports remaining, we are looking forward to our most successful year in the intramural league.

HOMECOMING

The 1962 homecoming parade theme was "A Tour of East Texas." The Sylvans Club constructed a motorized Piney Woods "Peckerwood" sawmill. This float placed fifth in the contest. As usual, the float was finished in plenty of time for the parade (about fifteen minutes before the parade started!)

Joellyn Jepsen was chosen as the Sylvans Club's Homecoming Duchess for 1962. She lived in Richardson, Texas before coming to Stephen F. Austin. Miss Jepsen was secretary of the 1962 Freshman Class, and she was one of the top six SFA beauty nominees.

Progress...

will be made...

because of us...

or in spite of us.
CHRISTMAS DINNER-DANCE

One of the highlights of the Sylvans Club year was the Christmas Dinner-Dance. This year the dinner was held in the Banita Ball Room at the Hotel Fredonia. The ball room was decorated using a Christmas and Forestry theme of sprayed pine cones and boughs.

After a very palatable meal, Mr. Lacy Hunt presented his annual scholarships to Fred Birch, Grant Gaumer, and B. J. Cox. Dr. T. Kallsten, Head of the English Department, then gave us an informative talk on "A NEW LOOK AT TREES." We learned from his speech that "old boxes are made from the box elder" and other interesting facts.

For the remainder of the evening the two-hundred guests danced to the music of the Darrell Holt Combo.
Mr. Hunt presents...

I'd rather see a purple tree than be one....

The smart ones.

THE LAURELS

Members pictured above are: Back row, Tijuana Gilmore, Pat Dowden, June Jones, Delores Barrow, Linda Hatch, and Virginia Durham; Front row, Jan Waikart, Linda Duggan, and Jolene Fry. Absent at the time photos were made were: Cherry Rheiner, Betty Richerson, Sherry Speights and Sharon Zook.

THE LAURELS, a social organization established this year in conjunction with the Sylvans Club, is composed of wives of SFA forestry students. Its primary objective is the assistance of the Sylvans Club in its activities. One project during the past year was the preparation of decorations for the Christmas dinner-dance. Through the meetings of the Laurels, the wives have an opportunity for closer association with each other as well as a means of sharing in their husbands' club activities.
Association of Southern Forestry Clubs

CONCLAVE

1962

Monticello, Arkansas was the scene of the 1962 version of the Association of Southern Forestry Clubs Conclave. Fifteen members of the Sylvans Club made the trip to Arkansas A & M College where the contests were held. Stephen F. Austin’s entries in the various events were: Robert Modisette - Pole climbing and log birling; Lou Waikart - compass and pacing; Phillip Pate and Jimmy Doss - log rolling; Martin Fry - pole classification; Bill Gibson - chain throwing; Robert Waite - bow sawing; and log chopping; Dominic Beran - pole felling; B. J. Cox - dendrology; Jeff Carroll - axe throwing; Phillip Pate - wood technology; Terry Brooks - bait casting; Joe Zaak - DBH estimation; Bill Gibson and George Alders - crosscut sawing; Fred Birch - timber estimation; and Robert Rheiner - cheerleader.

Total score did not give a true picture of the performances of the Sylvans in the contests. Although we only received third place points for the performances of Terry Brooks in bait casting and Bob Waite in bow sawing, our foresters gave the opposition moments of anxiety in some of the other contests.

The competition was not the only highlight of the trip. On Friday evening, the Arkansas A & M Forestry Club sponsored an evening of entertainment at “Harold’s Club” including blackjack with play money.

Wade Boyd, President of the Association of Southern Forestry Schools made the presentation of awards to the winners of the Conclave at the banquet Saturday evening. The University of Georgia team won first place honors.

After the banquet, the Texans started for home, tired but happy—with visions of bringing the Conclave to Stephen F. Austin in 1965. The return trip was made with only two incidents - Lou’s horse and wagon that weren’t there and Bob Rheiner almost driving across a bridge that wasn’t there!!!
We're waiting!

Come on, Kinky!

Two hands while learning.

Where's the damn bell?

Timber???

Go, go, go!!!

I caught first (fisherman's tale).

Peek-a-boo.
He broke my hook...

Practice makes first place.

They're really hitting today.

Only you can prevent forest fires.

Look, Mom, no cavities.

A GIRL???

OK, Pate, You can go.

A NOTE OF APPRECIATION

To the Advertisers in our 1963 Texas Tally, we wish to say a word of thanks. It is your support that makes it possible for the Sylvans Club of Stephen F. Austin State College to publish a permanent record of each school year in the Forestry Department.

In sincere appreciation,

Texas Tally Staff

have combined to become

forest
industries

Serving: LOGGING • FORESTRY • LUMBER • BOARD • PLYWOOD

Starting in July, 1962, the two leading journals serving the forest industries—The LUMBERMAN and The TIMBERMAN—combined to form a new publication, FOREST INDUSTRIES.

FOREST INDUSTRIES covers the complete industry from the growing and logging of trees, through the manufacturing and marketing of lumber, plywood, board and other wood products.

If you are not receiving your own personal copy of forest industries you will be missing a wealth of valuable information—SUBSCRIBE NOW!

"Preferred by Professionals"

When the going is tough and every minute counts, you need equipment you can count on. Poulan Chain Saws are built for stamina, service and "stay-on-the-job" economy.

Increase Timber Value up to 400%  
"Reuel Little Plan" Sure Pays Off!

Improve your timber this easy way
Change that worthless, unsightly mess into a beautiful pine forest. The Reuel Little Plan makes it easy to get rid of cull, wolf and hardwoods that are suppressing your pine and softwoods. Extra pulpwood alone will pay for reclaiming your timber in just a few years. It's easy and sure. Lowest cost method. Investment is low. Write today for complete information on the "Reuel Little Plan".

HAVE YOU PLANNED YOUR CAREER?

Plywood is a household word, and United States Plywood Corporation is synonymous with leadership in the field of both hardwood and softwood plywood. United States Plywood has led in making prefinished hardwood plywood available to homeowners in every economic bracket. The use of Wewdwood prefinished paneling as decorative wall material for new homes, as well as older homes, appears to be limitless.

Sales have grown commensurately with production, which, together with research and other contributions in the building materials field, has increased United States Plywood sales from $107 million in 1952 to more than $300 million this past fiscal year. The reward for United States Plywood's quality of products and outstanding service has been its growth to one of the top 200 industrial corporations in this country.

Chemists, physicists and wood technologists—all working together in United States Plywood research laboratories—make it possible for more than 600 salesmen and sales engineers throughout this country and Canada to offer the best choice of structural and decorative materials available anywhere to architects, industrial users and builders.

Today, the building industry represents a fantastic $60 billion market—it will continue to grow. United States Plywood Corporation could help you to become a part of the growth with that burgeoning market.
